DUST SEAL

Prevent contamination in your dust seal grooves...

Now, you can keep oil and debris out of your granulation with Yener's dust seals.

We highly recommend using dust seals with your punches. While they are an optional accessory, their benefit far outweighs their price. You'll also be able to interchange and reuse.

- Provide a secondary barrier to the upper punch seals
- Prevent oil and other debris from contaminating granulation
- Ensure production runs smoothly and cut back on cleaning time
